4. Have more fun that anyone deserves

## Philosophy

“Good leaders know where they are going and take their people with them.” **James E. Faust**

“Good Managers balance the difference between doing it right and doing it right now.” **Cody Adams**

## Education

Bachelors of Science – (2003) Information System Management minoring in Computer Programming  
**University of San Francisco**  
San Francisco, California

Graduate with Honors  
**Fort Sill, AFDC Academy**  
Fort Sill, Oklahoma

Graduated with Honors  
**Camp Williams, Primary Leadership Development Course (PLDC)**  
Camp Williams, Utah

## Skills

- Extensive leadership and team/project management experience
- Exceptional customer service and mentoring skills
- SAS/SAAS, Amazon Cloud/Web Services
- Business Support Systems (BSS)
- Operational Support Systems (OSS)
- RAD, Agile and SCRUM methodologies
- PCI, HIPAA, FERPA compliance
- Project Management, JIRA
- Business Process Automation (BPA)
- eCommerce implementation, Merchant Services, APIs and Endpoints
- WordPress installations and administrative support
- GSuite Migrations
- Experienced in the following software applications, systems and languages:  
MySQL, MariaDB, Oracle, PL/SQL  
PHP, PERL, HTML, JavaScript, CSS, DHTML, XML, JQuery, REST, Agile  
Microsoft Word, Excel, Access, PowerPoint, Visio  
Linux: Centos, Ubuntu  
Apache, IIS/PWS, Nginx  
WHM, cPanel  
GIT, Subversion Server/Client, Tortoise  
Paint Shop Pro, Adobe Acrobat, TOAD.  
eMail Server Management
- Fluent in Dutch and Flemish

## Work History

**Apple** – October 2021 – Present

Contractor: LAMP Developer/Program Manager (Austin, Texas)

- Providing LAMP support/development to retail business intelligence team
- Recommending and designing system architectural design improvements and general enhancements and improvements for LAMP stack delivery internal, web-based reports and other support related applications.

**Apple** – November 2020 – July 2021

Contractor: LAMP Developer/Program Manager (Cupertino, California)

- Reported to upper level management to help manage off shore development efforts
- Worked with the off-shore team by providing application architectural design improvements and enhancements of an internal, web-based product forecasting application in a LAMP stack environment

Reason for leaving: Unable to relocate.

**Target Local Marketing** – November 2017 – November 2020

IT Director

- Providing LAMP, System Admin, Website and other technical consulting services to 650 clients. (Target Local Marketing – primary contract)
- Coordinating administrative support and development between several remote groups from India, New York, California, Idaho, Utah and Canada.
- Provide Email migration to Google GSuite services
- Provide WordPress admin support and installations
- Provide Domain Registrar support and consultation
- Provided business and operational support to internal dev and sales teams
- Developing custom LAMP applications including:
  - Internal Artwork Workflow application for Havenlight - a local Art Gallery
  - eCommerce Business Solution for Bee Scientific and affiliates.
  - Custom MVC framework (PERFICIO) to support client RAD

Reason for leaving: Slow down due to Covid

**Innoventrum** - November 2015 – November 2017

Lamp (PHP) Sr. Application Architect/Project Manager

- Worked with the executive team to design and implement a new, home-grown e-commerce solution using Amazon Web and Cloud Services to consolidate work efforts.
- Created and managed the development team to redesign and rebuild the base DB architecture to centrally align all websites and applications
- Provided managerial support to the project management team
- Recommended and documented code standards and Development SOPs
- Defined, built, and implemented internal business and operational support (BSS/OSS) systems
- Migrated web sites and applications to the new framework
- Evaluated current processes and code to identify areas of improvements and provided coding support to implement the improvements
- Served as the Subject Matter Expert on advanced shopping cart, merchant services, and invoicing and accounting concepts on the web.
- Trained entry-level developers in LAMP, Apache and NGINX web services, and advanced programming and database skills

Reason for leaving: Innoventrum ran out of funding

**Bluehost** - May 2015 – November 2015  
Lamp (PERL/PHP) Stack Developer

- Supporting multiple teams in the day-to-day technical/programming aspects to meet business objectives
- Worked directly with and provided code support for the primary marketing group responsible for acquiring new subscriptions and revenue streams
- Maintained multiple websites and pages using PERL templating frameworks.
- Collaborated with other teams and members to provide insight for future technical direction.
- Working with our QC team to ensure quality and seamless rollouts to production servers.

Reason for leaving: A corporate shift in expected role and Innoventrum requested my help and expertise.

**Utah Valley University (UVU)** – February 2011 – June 2015  
Director of Interactive Programming Services

- Directed a group of internet application developers responsible for creating the University's web-based applications in a LAMP stack environment as well as supporting legacy applications built upon MySQL and written in Cold Fusion and PHP in the Symfony framework.
- Coordinated implementation of the latest industry standards pertaining to web development and internet security on UVU's campus servers and networks.
- Performed project management duties using Agile and Scrum methodologies to deliver products and services to UVU's faculty, students, and staff.
- Performed staff/team management including work, vacation and training schedules.
- Performed top-level database management and administration for MYSQL schemas and some programming support for Oracle instances.
- Mentored students in IT related fields including DB admin, Programming, and Project Management.
- Developed and implemented database security strategies

Reason for leaving: An internal change in direction for IT. Accepted BlueHost recruitment offer.

**MyExpertSolution** - October 2008 – October 2010  
Senior Application/Database Architect/Project Manager

- Worked with upper management to bring their vision to technical fruition.
- Managed the developer and tester teams.
- Architected, designed and implemented a MySQL/PHP (LAMP) Enterprise solution with my teams designed to bring mental health experts and MyExpertSolution members together in a structured, confidential environment.
- Responsible for designing, purchasing and configuring the necessary hardware for the teams' core development, test, and production environments.
- Provided the vision and architectural design and specifications for the Dev and QC teams to deliver the web application behind the company's concept.

Reason for leaving: Lost funding

**ZooBuh! Inc.** - November 2007 – April 2008  
Primary Architect/Acting Director of IT

- Evaluated current database, security and web architectures to propose and implement improvements of current application. Played a major role in providing a LAMP based application to develop email and blogs services models. I also provided essential, long-term solutions to ZooBuh!'s original eCommerce strategy enabling the application to automate a greater portion of their business process which eliminated several tedious management steps.

Reason for leaving: Finished commitment

**AccessData** - October 2004 – September 2007  
Senior Application/Database Architect/Project Manager

- Worked closely with upper level management and the executive team and created a ColdFusion -MySQL based Enterprise Portal to support all aspects of AccessData's day to day business need including customer management, training schedules, eCommerce sales, software/dongle management, inventory and shipping.
- Migrated several systems into a secured centralized data source.

Reason for leaving: Finished objectives; Elevated to greater challenges

**Vodafone-US** - August 2000 – October 2002  
Senior Application Developer/Program Manager

- Provided HTML, client-side JavaScript, and CSS solutions for the following Vodafone web portals:
  - North America (Verizon)
  - Australia
  - New Zealand
  - Malta
  - Egypt
  - Romania
- Acted as the liaison between the CTP UI/UX team and the portal development teams, coordinating required template and source code changes.
- Served as an in-house HTML/CSS/JavaScript reference and mentor for other coders on various teams.
- Delivered Mirapoint messaging brands for the Australian, New Zealand and Romanian efforts.

Reason for leaving: Elected not to relocate to Germany in wake of 9/11

**PacBell Communications**- July 1996 – August 2000  
Application Developer/Project Manager

- Served as team lead on a multitude of internal projects including :
  - Sales/Marketing Enterprise – Information Services QuickHit Team
  - Enterprise Software Solutions

Architected and developed a ColdFusion/Oracle based, enterprise-wide communications distribution application (OSS) for over 17,000 sales representatives throughout the United States via SBC's Intranet.

- Customer Network Management (CNM)  
FasTrak™ View Web Application

Designed and presented the prototype resulting in the procurement of a two million dollar budget to complete the project.

Delivered the completed product currently being used by Southwestern Bell's Frame Relay and ATM customers nationwide.

- Pacific Bell ACN/Broadband – ASOS

Built and maintained an UNIX based intranet site that provided and optimized nation-wide access to Tier 4 requirements documents for the ASOS portion of PacBell's "One OS" – broadband network solution. By doing so, I reduced the maintenance by 91% and improved productivity and data integrity by turning a four day workload into a 15 minute activity.

Reason for leaving: Recruited for skillset by Vodafone.

**U.S. Military, National Guard** (Honorable Discharged - 2005)

**Sergeant, E5**

Alpha Btry            1/143 Field Artillery (M109 Mech. Howitzer)

Charlie Btry         1/140 Field Artillery (M198 Towed Cannon, M109A6 Paladin)

Served as an advance party member, providing frontline security and establishing initial communication prior to occupation. Responsible for critical communications between units and coordinating fire direction to the cannon crews. Served as section chief during annual training

## Specialized Training

### Cold Fusion

- Server MX

### Oracle

- SQL and PL/SQL using Procedure Builder

### MySQL

- MySQL Triggers, Functions and Stored Procedures

### Military Training

- Fire Direction Control 13E20
- Cannon Crewmember 13B10
- Primary Leadership PLDC

## Accreditations and Memberships

- Mona City Council member
- Juab County Search and Rescue
- Local 4H volunteer
- Boy Scouts of America – earned the rank of Eagle Scout.
- Evangelical Youth/Young Men Leader
- Awarded I Corps 1/140 FA Soldier of the Year.
- CNM top web designer (BOTI).

## Hobbies and Personal Interests

- Family
- Beekeeping (invented the 'Bee Barrel' – [www.beescientific.net](http://www.beescientific.net))
- Camping
- Wood working
- Legos
- Auto Restoration
- 3D printing
